DETAILED ACTION

Election/Restrictions

The election of the following species in the Response, filed 5/23/2007, is acknowledged: X is NR_4 , Y is NHR_5 , R_2 is $(\text{CH}_2)_n\text{COOR}_6$, R_4 is H, and R_5 and R_6 are alkyl. Claims 1 - 26 and 36 - 40 are pending, of which claims 4, 5, 8 - 11, 13 - 26 and 37 - 40 have been withdrawn from consideration at this time as being drawn to non-elected species. Claims 1 - 3, 6, 7, 12 and 36 are readable upon the elected species and have been examined herein on the merits for patentability.

Claim Rejections - 35 USC § 102

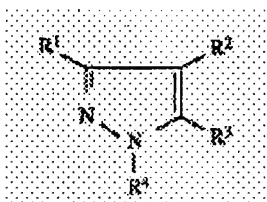

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 - 3, 6, 7, 12 and 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Merkle *et al.* (US 5,569,769).

Merkle discloses derivatized pyrazole compounds (abstract). For example, the compounds have the following structure:

Such compounds read on the elected species of the instantly claimed generic structure, for example, when R^2 is a C_1 - C_6 alkyl which is substituted by a carboxyl group and R^4 is a C_1 - C_6 alkyl interrupted by heteroatoms such as nitrogen. R^1 and R^3 may include hydrogen, alkyl, phenyl, etc (see column 3, lines 30 – 60. It is noted that Merkle does not specifically recite that his compounds are used as chelating agents.

However, the recitation of the intended use of the compound as a chelating agent has not been given patentable weight to distinguish over Merkle. For example, the instant claims do not require the presence of a metal ion. The intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Since Merkle discloses compounds which are the same as those claimed, they would be capable of performing the intended use, as claimed.

Conclusion

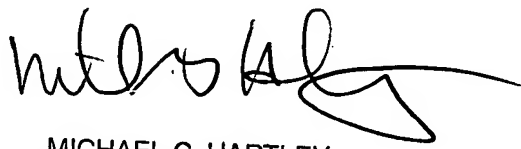

No claims are allowed at this time.
